

AN EXTENSION OF PHYSICAL AND CYBER SECURITY INTO THE AIRSPACE

INTERNAL UAV DETECTED
ACCESS GRANTED

UNAUTHORIZED UAV
ACCESS DENIED

A fence no longer defines an enterprise's perimeter

escDRONES™ - a new part of corporate security management

■ The Threat

(Millions of Drones sold each year!)

- Espionage
- Sabotage
- Terrorism
- Accidents from hobbyist drones

■ The Response

- Extend enterprise perimeter to include airspace
- Detect, Track, Identify/Verify all UAS in enterprise airspace
- Utilize UAS for surveillance
- Integrated enterprise security management policy, procedure, technology to take advantage of UAS capability and mitigate risk from unauthorized UAS

Integrated Enterprise Security System Approach Integration

DRONE DETECTION

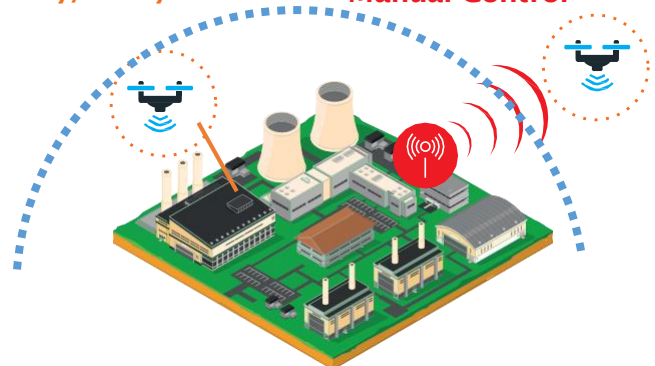

Detect

Track

Identify/Verify

EXTEND SURVEILLANCE

- Multi-Sensor
- Full Facility Coverage
- Fully Autonomous or Manual Control

Ask us about:

escMSAP™ - Multi Service Aerial Platform (MSAP)

escCUAS™ - Counter UAS (CUAS)

ROI

- Increased enterprise security
- Reduced risk, vulnerabilities, liabilities
- Reduced standing guard/patrol requirements/cost
- Platform for added capability (e.g. maintenance inspections)
